# KEITH KELVIN KITHINJI

**Junior QA Analyst | Software Tester & Developer**

Nairobi, Kenya | +254 795 294 593 | keithkelvin308@gmail.com
Portfolio: keithkelvin308-a11y.github.io | GitHub: github.com/keithkelvin308-a11y | LinkedIn: linkedin.com/in/keith-kelvin-b60920330

## PROFESSIONAL SUMMARY

Junior QA analyst and developer completing a Diploma in ICT at Michuki National Polytechnic. Tested AFH Manager, a US care-home compliance web app, across 12 modules, documenting 16 defects (2 critical, 4 high) and 27 test cases for management and developers. Product owner and developer of KaziPap, a Python Flask workforce and job-matching platform for a Kenyan recruitment business, built with AI-assisted tools and hardened for production. Analytical, detail-focused and self-driven, with a particular eye for data that does not agree across screens. Growing interests in AI, data analysis and quantitative finance.

## SKILLS

**QA & Testing:** Functional testing; data-validation testing; cross-module consistency testing; test case design; defect reporting and tracking (severity and priority); Excel test case and defect trackers; regression and retest planning; privacy-aware evidence handling (screenshot redaction)

**Development:** Python (Flask), JavaScript (basic/intermediate, vanilla JS), HTML/CSS, SQLite/PostgreSQL, AI-assisted development, requirements definition

**Tools & Platforms:** GitHub (version control and publishing), Linux, Termux, Docker, Caddy

**IT Support & Networking:** System troubleshooting and optimisation, router configuration, LAN setup

**Analytical:** Basic statistics, logical modelling, algorithmic problem-solving

## EXPERIENCE

**QA Analyst** | AFH Manager (afhapp.com)

*October 2026 – Present · Adult family home care management web app, Washington State, USA*

- Tested 12 areas of a care management app built around Washington State WAC 388-76 compliance and HIPAA-focused record handling: login, dashboard, residents, vitals, menu, care plans, incidents, staff, compliance, the Citation Alerter, protected record disclosure and the daily email.
- Found and documented 16 defects (2 critical, 4 high, 7 medium, 3 low), each with steps to reproduce, expected and actual results, severity, priority and evidence.
- Exposed cross-module consistency failures, including contradictory compliance scores (10% on the Compliance Overview against 82, Grade B, in the Citation Alerter) and staff shown as compliant on one screen but non-compliant on others.
- Identified data-validation and logic gaps: future birth dates accepted and producing negative ages, incidents misclassified by type, and room occupancy shown incorrectly.
- Wrote a QA findings report for management and developers with prioritised fixes and a focused retest plan; built a test case and defect tracker in the owner's Excel format (27 test cases), with evidence screenshots redacted for privacy.

**Product Owner & Developer** | KaziPap, Chuka Town, Kenya

*2026 · Workforce management and job-matching platform ("Kazi papo hapo") · Prototype, ready for deployment*

- Defined the requirements for a recruitment business supplying casual and permanent workers, and built the platform with AI-assisted tools using Python Flask, SQLite/PostgreSQL and vanilla JavaScript.
- Delivered admin and worker roles, worker self-registration with a Kenya Data Protection Act consent step, and qualification and specialisation matching with scoring.
- Added ID and certificate upload with admin verification, referral links with a points system and admin tracking, employer job requests, and placements with a 30-day replacement window.
- Implemented M-Pesa payment record-keeping, testimonials and a video showcase, and a mobile-first interface with an English/Kiswahili language switch.
- Prepared for production with CSRF protection, rate limiting and a Docker/Caddy deployment, planned for kazipap.ke; organised the code and documentation for publishing on GitHub.

**Freelance IT Support** | Self-employed

*2023 – Present · Self-driven learning phase*

- Troubleshot computers, devices and network configurations, including router configuration and LAN setup.
- Diagnosed and improved computer performance using system tools; solved real-world software and hardware problems for users.

## PROJECTS & LEARNING

- **Personal portfolio website.** Static, mobile-first portfolio website presenting case studies and this CV, published with GitHub Pages at keithkelvin308-a11y.github.io.
- **AI and technology learning track.** Structured self-learning roadmap in AI, software development and quantitative methods, documenting progress and practical implementations; exploring crypto markets and digital finance systems.

## EDUCATION

**Diploma in Information and Communication Technology (ICT)** | Michuki National Polytechnic

*2025 – 2026*

## ADDITIONAL INFORMATION

**Languages:** English (fluent), Swahili (fluent)

**Strengths:** Analytical and logical thinking, fast learner, problem-solving mindset, independent and self-driven

**Interests:** Quantitative finance, AI and machine learning, algorithm design, technology
